OBJECTIVE

Software Development Engineer focused on building **scalable full-stack systems** and **AI-driven applications**. Passionate about designing robust **backend architectures**, integrating **agentic AI workflows**, and translating complex problems into reliable, high-impact engineering solutions.

EDUCATION

- Chandigarh University	2024 – 2028
<i>Bachelors of Engineering (Computer Science and Engineering)</i>	Punjab, India

EXPERIENCE

- AI Hack Matrix 2026 | DoseGuard (Feb'26)

- Designed a **sensor-driven micro-dosing patch** for controlled drug release.
- Built logic to compute a **Need Score** and trigger dosing from vitals/motion signals.
- Added safety limits + fail-safe behavior (**caps, cooldown, sensor fail → pump OFF**).
- Demoed with **simulated body signals**, micro-pump, and a live dashboard (plots + alerts).

PROJECTS

- Scalable E-Commerce & Services Platform – Admin & Seller Dashboards

Tools: *React.js, Node.js, REST APIs*

[LiveDemo](#)

- Developed a **admin** and **seller** dashboard of scalable e-commerce & services platform for electronics and home appliances using **React.js** and a **Node.js backend** with modular architecture.
- Integrated **Invincible Ocean APIs** for secure **Aadhaar, bank** and **criminal background verification** of sellers.

- Yorigin

Tools: *Node.js, MongoDB, React.js, shadCN UI, CList API, RESTful APIs*

- Built a **unified coding profile platform** using **Node.js**, integrating **LeetCode GraphQL APIs**, **Codeforces public APIs**, and **Cheerio-based HTML parsing** for CodeChef.
- Developed a **React** frontend using **shadcn/ui**, featuring **tables and profile cards** for detailed user statistics.
- Integrated a third-party public API - **CList** to fetch live and upcoming coding contest schedules.

SKILLS

- **Programming Languages:** C, C++, Python, Javascript, SQL
- **Frameworks and Libraries:** React.js, Next.js, Node.js, Nest.js, FastAPI, Django, Pandas, NumPy
- **Databases:** MySQL, MongoDB
- **AI/ML:** ML, NLP, RAG, LangChain, LangGraph, TensorFlow, PyTorch, Scikit-learn, Gen AI, LLMs, Agentic System
- **CS Fundamentals:** DBMS, OOPs, Operating System, Networking, Software Engineering, System Design
- **Others:** DSA, Git, Github, REST APIs
